INTRODUCTION

The information contained in this pack is intended to raise awareness and protect individuals from serious harm and/or loss of life.

It represents the combined effort of several well-educated, well-informed professionals.

Please do not ignore this information. It is your right to disagree but we still encourage you to inform yourselves, remain vigilant and stay safe.

Every person reading this has a duty of care to themselves and those around them.

We thank you for your time.

GEOENGINEERING

Unbeknown to many, weather modification programs have been active since the 1930s. There are hundreds of existing patents to support this statement, if you care to research.

'Top Gear' fans may recall an episode involving the artificial creation of a rain cloud using an RS-25 flight engine. This is one of many ways technology can be utilized to manipulate or modify the weather.

Perhaps the most controversial example of geoengineering is "Stratospheric Aerosol Injection" otherwise known as cloud seeding.

An array of hazardous chemicals and heavy metals such as aluminium, barium and strontium are being sprayed into the atmosphere, in order to manipulate the Earth's climate.

Despite obvious risks to public health and the environment, being able to control the weather also raises other concerns. For example, a climate crisis could easily be manufactured with this technology. What if it's used to warm up areas of the Earth?

QUESTIONS THAT NEED ANSWERING:

- **What are the short-term and long-term effects on public health?** These programs could be severely detrimental to our health. Where are the safety studies?
- **What damage are these chemical concoctions having on the environment?** We do not know what effect geoengineering is having on wildlife.
- **What affect are these programmes having on our economy?** Who authorized these large scale programmes? Who is funding them? Where was the vote? Could it harm the farming industry?

UK GOVERNMENT'S VIEW

"Solar Radiation Management technologies reflect some of the Sun's energy that reaches Earth back into space. Examples include the brightening of marine clouds and injection of aerosols into the stratosphere." (As written in their own policy)

OFFICIAL UK GOVERNMENT POLICY:

www.gov.uk/government/publications/geo-engineering-research-the-government-s-view/uk-governments-view-on-greenhouse-gas-removal-technologies-and-solar-radiation-management

HOW TO SPOT STRATOSPHERIC AEROSOL INJECTION (SAI)

PLANE TRAILS

Aircraft leaving long trails of pollution which **do not disappear** over time. A contrail should typically disappear after a few seconds.

POLLUTION LINES/GRIDS

These plane trails often form a grid formation in the sky. Typically (but not always) situated across our sun.

SUN BLOCKING

Over time, these trails expand and spread out over the atmosphere to form a thick layer of smog known as a “white out”.

5G INFRASTRUCTURE

Firstly let's explore what **5G** is - it simply means '5th Generation' wireless networking which is the latest generation of cellular technology.

You may have noticed 5G infrastructure being installed all over the world during the last couple of years. It comes in lots of different shapes and forms, including - cell towers, masts, street lamps and traffic lights.

The purpose of this infrastructure is to support the expansion of the Internet of Things (IoT); a sophisticated network of smart devices.

But at what cost?

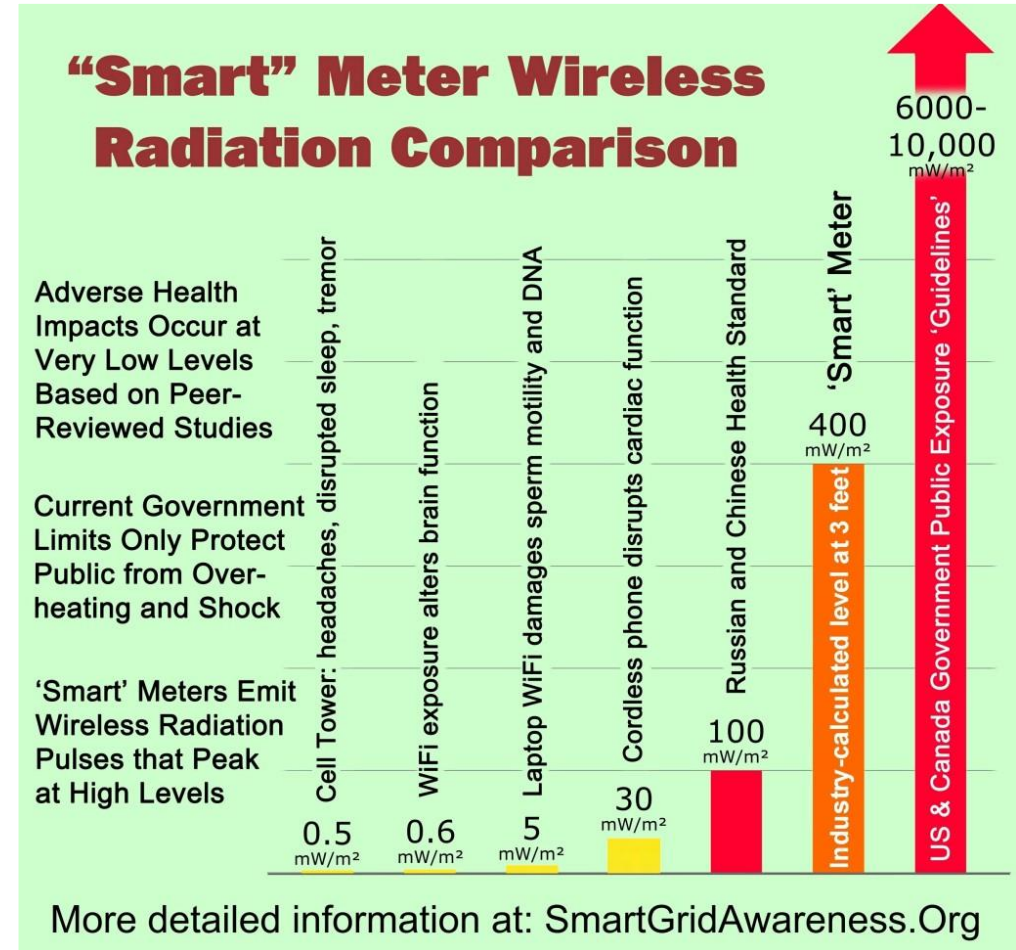

Were you aware 5G infrastructure emits a dangerous amount of EMF Radio Frequency (Microwave) Radiation. It has been linked to headaches, nosebleeds, miscarriages, tumours and cancer.

Many petitions to have 5G masts removed from specific areas have been granted on the grounds they are detrimental to public health. In some parts of the world it has been banned/dismantled all together.

EMF generated by this technology has also been responsible for disrupting (and killing) wildlife - including animals, plants and insects.

HOW TO TEST EMF RADIO FREQUENCY (MICROWAVE) RADIATION

- You will need to purchase an EMF Reader which allows you to measure Radio Frequency (RF) Radiation such as [TriField TF2 Electromagnetic Field EMF Meter](#)
- Set your EMF reader to detect Radio Frequencies - turn dial to RF.
- Record RF levels around 5G infrastructure such as masts, street lights and traffic lights
- Anything reading above 0.5 Mw/M^2 can be detrimental to health. 5.0 Mw/M^2 and above has the ability to damage DNA (see chart).

DUTY OF CARE

You have a duty of care to yourselves and to others around you to check these Radio Frequency Radiation levels are at a safe level. This can be accomplished fairly inexpensively and may save lives.

It is your responsibility to safeguard staff, patients, co-workers, colleagues, children, friends and family.

WHAT TO DO IF YOU ARE BEING EXPOSED TO DANGEROUS LEVELS OF 5G RF RADIATION:

Record the readings, remove yourself and others from the harmful effects of 5G technology. Inform neighbours, managers, co-workers, health and safety officers, HR, unions, authorities etc. Work together as a community or workforce to have the masts removed or relocated.

DO NOT TAKE NO FOR AN ANSWER!

MRNA TECHNOLOGY

Let us begin by saying we support body autonomy, informed consent and the right to choose any medical procedures we participate in. Many of us are healthcare professionals and can confirm this is in alignment with the training we all received. We are a mix of vaccinated and unvaccinated representatives, both equally concerned with recent data being released into public domain.

Concerns are being raised with the amount of injuries/deaths recorded on [VAERS \(US\) Yellowcard \(UK\)](#) and [EudraVigilance \(EU\)](#) databases as result of MRNA vaccination. This information is being withheld from the general public. In fact, vaccine injuries/deaths are not being reported at all by the mainstream media.

The [UK Office of National Statistics](#) has also published some alarming data proving the vaccinated account for over 90% of COVID19 deaths. It also shows a significant increase in sudden adult death syndrome and miscarriages since the roll-out of these vaccinations. [Expose News](#) provide a good summary of this data.

Pfizer Inc. tried to delay the release of it's COVID19 vaccination data report by 75 years - we have been able to retrieve parts of it via FOI request. What has been obtained so far shows there were over 2000 known side effects, including myocarditis, BEFORE the worldwide roll-out of COVID19 vaccines were introduced.

"Safe and effective" - Why weren't known side-effects discussed with people opting into vaccination for a virus with a 98+% survival rate? We know informed consent cannot be established/achieved unless known risks are discussed.

MAINSTREAM MEDIA (MSM)

There are approximately 1500 newspapers, 1100 magazines, 9000 radio stations 1500 TV stations and 2400 publishers. Nearly all of which are owned by six major corporations - and these corporations are "owned" by very powerful asset management firms such as Blackrock and Vanguard.

Please take a moment to think about that.

Six corporations control everything you watch, everything you read, everything you BELIEVE - which, more often than not, is proven to be lies or manipulations of truth. ***"He who controls information, controls the world."***

The mainstream media's primary objectives appears to be; spreading fear, creating division and distraction, pushing global narratives and propaganda. People's trust in MSM is at an all time low - is this a surprise when there's overwhelming evidence to prove lies, gaslighting and censorship of truth?

This is also evident in social media (i.e. Facebook/Meta, Twitter, Instagram etc.) where any opinion opposing mainstream narrative is censored. You must start asking questions when leading professionals in their field are being silenced.

WHERE TO LOCATE TRUTH

Obtaining truth within a sea of information is not easy. It can be an extremely difficult place to navigate.

The fundamental rule to follow is you should NEVER accept something you read/hear/view as FACT. Use your own intelligence, initiative and intuition - do your own research. Question everything.

Follow the money, understand who owns what. Do not take orders from a television set, mobile or newspaper (particularly when it involves your health or well-being).

Information obtained from uncensored media sources such as **Telegram**, **Rumble** and **BitChute** may be more aligned to real truth than Mainstream Media (MSM). But you should always research information yourself rather than being spoon-fed.

DIGITAL ENSLAVEMENT

- Understand a cashless society means zero financial freedom.
- Central Bank Digital Currency - every transaction you make will be monitored and the state will have complete control over what you can and cannot purchase. If they decide they want to prevent/limit you purchasing certain items (meat, alcohol, cigarettes etc.) Say you want to attend a human rights protest in another city - your digital currency simply will not allow you to buy those particular train tickets. It is full control of your life.
- Digital ID - your activity/location will be tracked every second of the day. Eventually they want us all to have ID microchips placed under our skin.
- Social Credit System - a "rating" system for human beings. It doesn't just govern your financial situation like a credit score, but EVERYTHING you do as a person. They are already using it in places like China, along with facial recognition technology. For more information [click here](#).
- Electric Cars - electric cars can be hacked, shut down and/or controlled remotely. The state will be able to disable your vehicle (from another location) if you do something they don't like. For example - posting an opinion online that goes against their mainstream narratives.

BE WARY OF THE GLOBAL WARMING NARRATIVE

- We know technology is capable of manipulating the weather - see page 4. It's perfectly feasible our climate could be tampered with to create a "Global Warming" scare. Parts of the world could be intentionally warmed up using geoengineering methods such as Stratospheric Aerosol Injection.
- A manufactured climate crisis could be used to control or enslave the population. Confining people to their homes or forcing them to travel less.
- CO2 limits are already being added to MasterCard credit cards. Although non-mandatory at the moment, how long is it before it's compulsory and we are unable to purchase goods because we've "exceeded our CO2 limit"?
- Globalist-owned media (MSM) is already using fear to push the climate crisis narrative. This is evident in today's weather forecasts with intimidating red graphics and warning symbols everywhere. They are targeting the viewer's subconscious mind - a prime example of the programming they use to control people.
- In-depth studies of the Earth's climate show the core temperature naturally rises and falls. It has done for thousands of years. Although we all agree we must do more to look after our Earth, the human-CO2-factor is severely overexaggerated.
- Over 70% of global CO2 emissions are generated by just 100 companies. Yet, it is mostly the consumers who are being targeted/penalised. Meanwhile, the wealthy few are allowed to travel around freely in their private jets.

- **Water-powered (hydrogen) engines have been invented**, anyone who has tried to release this information has been assassinated or died under strange circumstances - Stanley Meyer, Aaron Salter etc.
- Water is an unlimited, renewable resource - however, there are strict rules enforced by the government around digging your own wells to access clean water. The state do not want people to have access to their own fresh water sources.
- Fluoride and other chemicals are intentionally added to our water supply, which disrupt brain function and are detrimental to our health. The UK have recently admitted they are adding even more fluoride to the water supply claiming "it's to help people's teeth".
- **Nikola Tesla knew how to harness electricity from the air around us.** But this technology is kept hidden from us. If this information was public knowledge - there would be free, unlimited energy for all (with zero pollution).
- Ask yourself this. If CO2 emissions are a genuine threat to our existence why have they not released water-powered technology and free-energy patents? The technology/knowledge already exists. Why do they insist in enslaving us with fossil fuels, water bills, energy bills and petroleum/electric powered vehicles?
- Electric cars are now being sold to us as the "answer" to our problems. But we know hydrogen/water powered vehicles have already been invented. Electric cars still require fossil fuels (where do you think the energy is coming from) and those big lithium batteries used in these vehicles require an astronomical amount of resources to manufacture. Also, electric cars are just big computers on wheels that can be remotely hacked/hijacked.

A series of light blue, dashed, wavy lines that flow from the top left towards the center of the page, creating a sense of movement and depth.

THANK YOU

Please understand we have nothing to gain from sharing this information. It is your right to disagree with the content, but please be vigilant. We just want people to remain safe, healthy and free.

May the truth prevail. God bless you all.
